

Lines, paths, data transforms, small multiples

You'll need to run `npm run start` to start up Parcel.

Chart 1: Labeled lines

Let's make a handful of lines and put labels at the end of them.

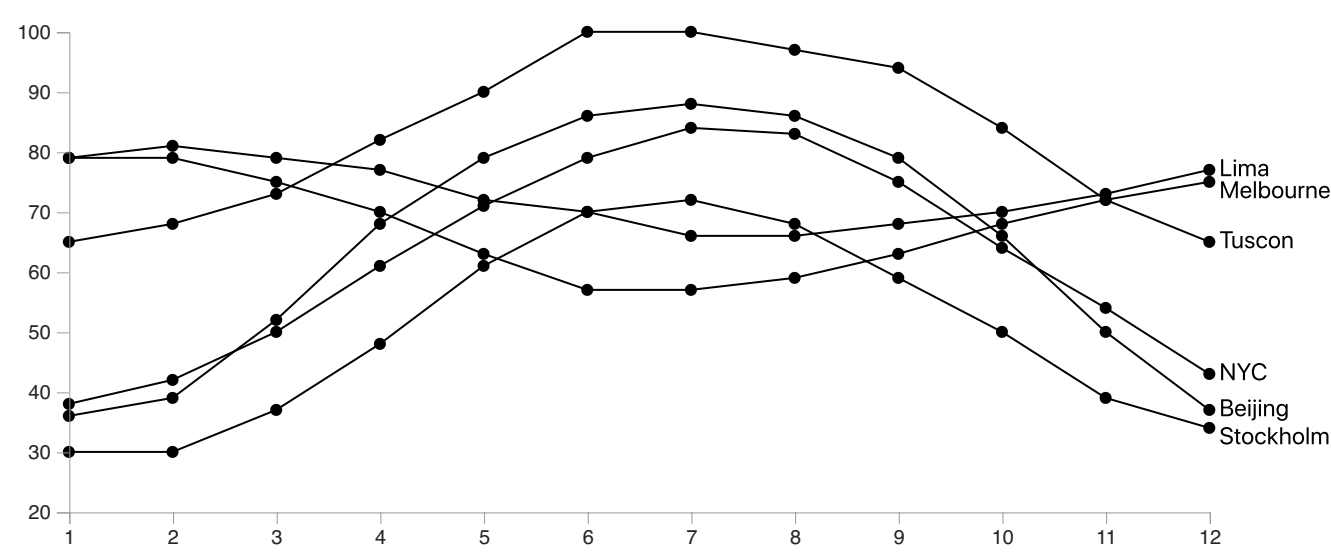

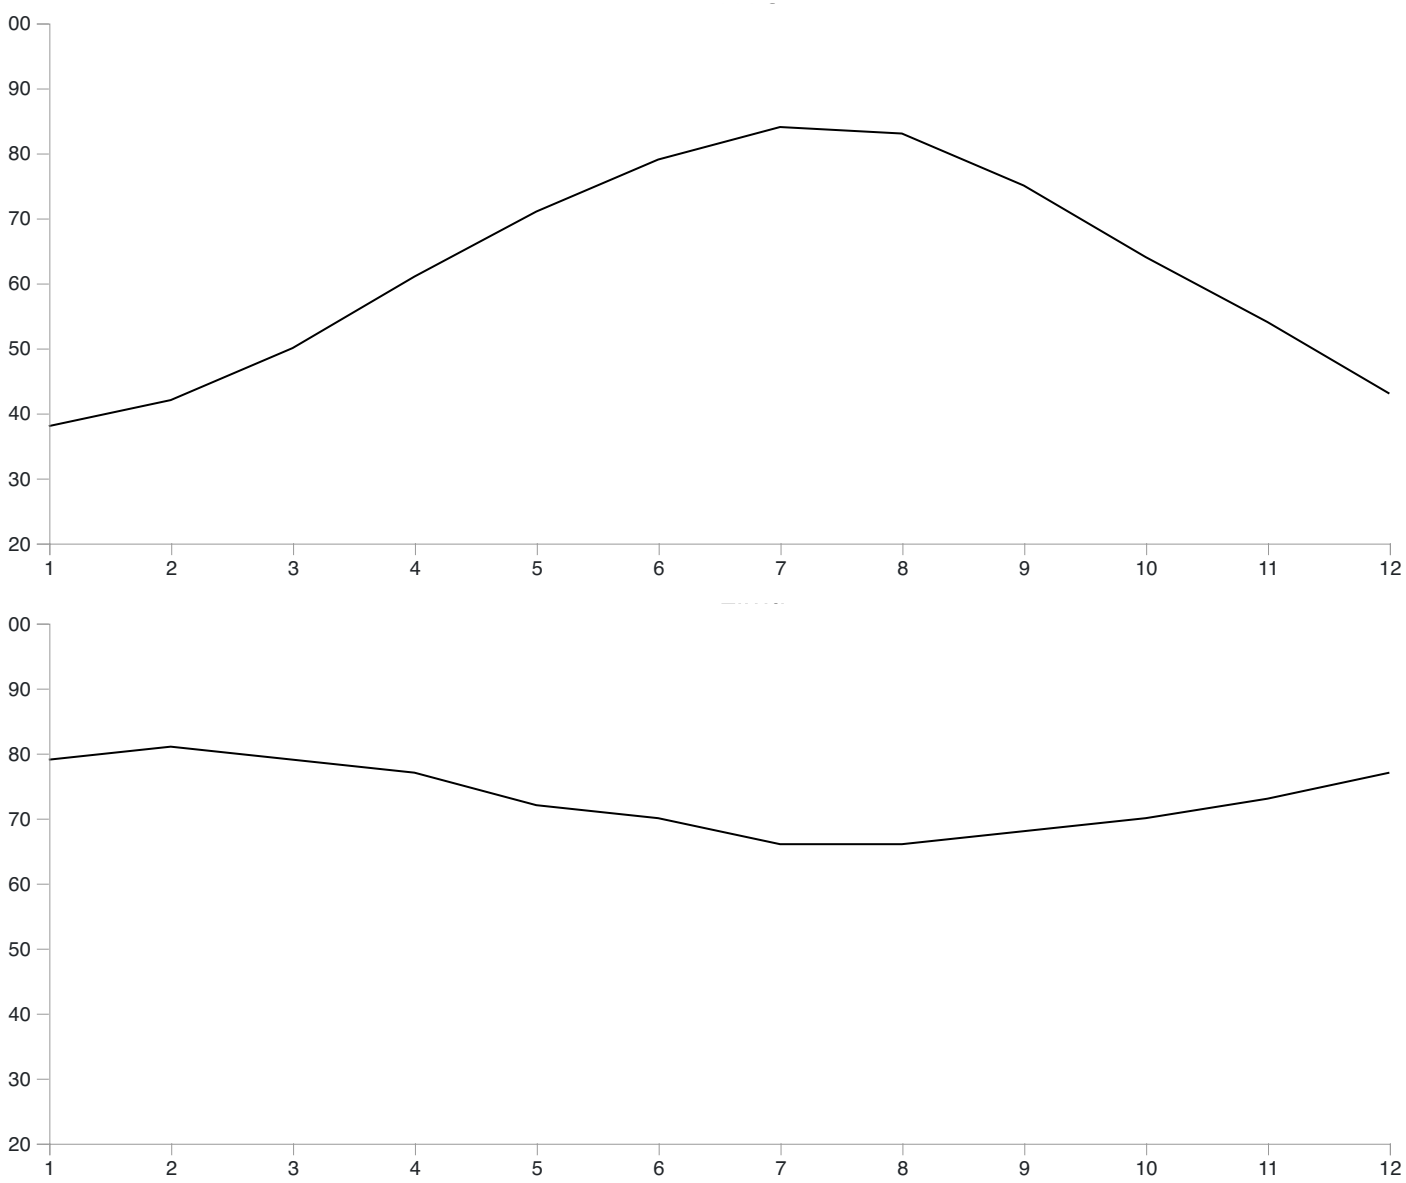

Chart 2: Multiple charts

That's kind of busy, so let's split them up into totally different charts.

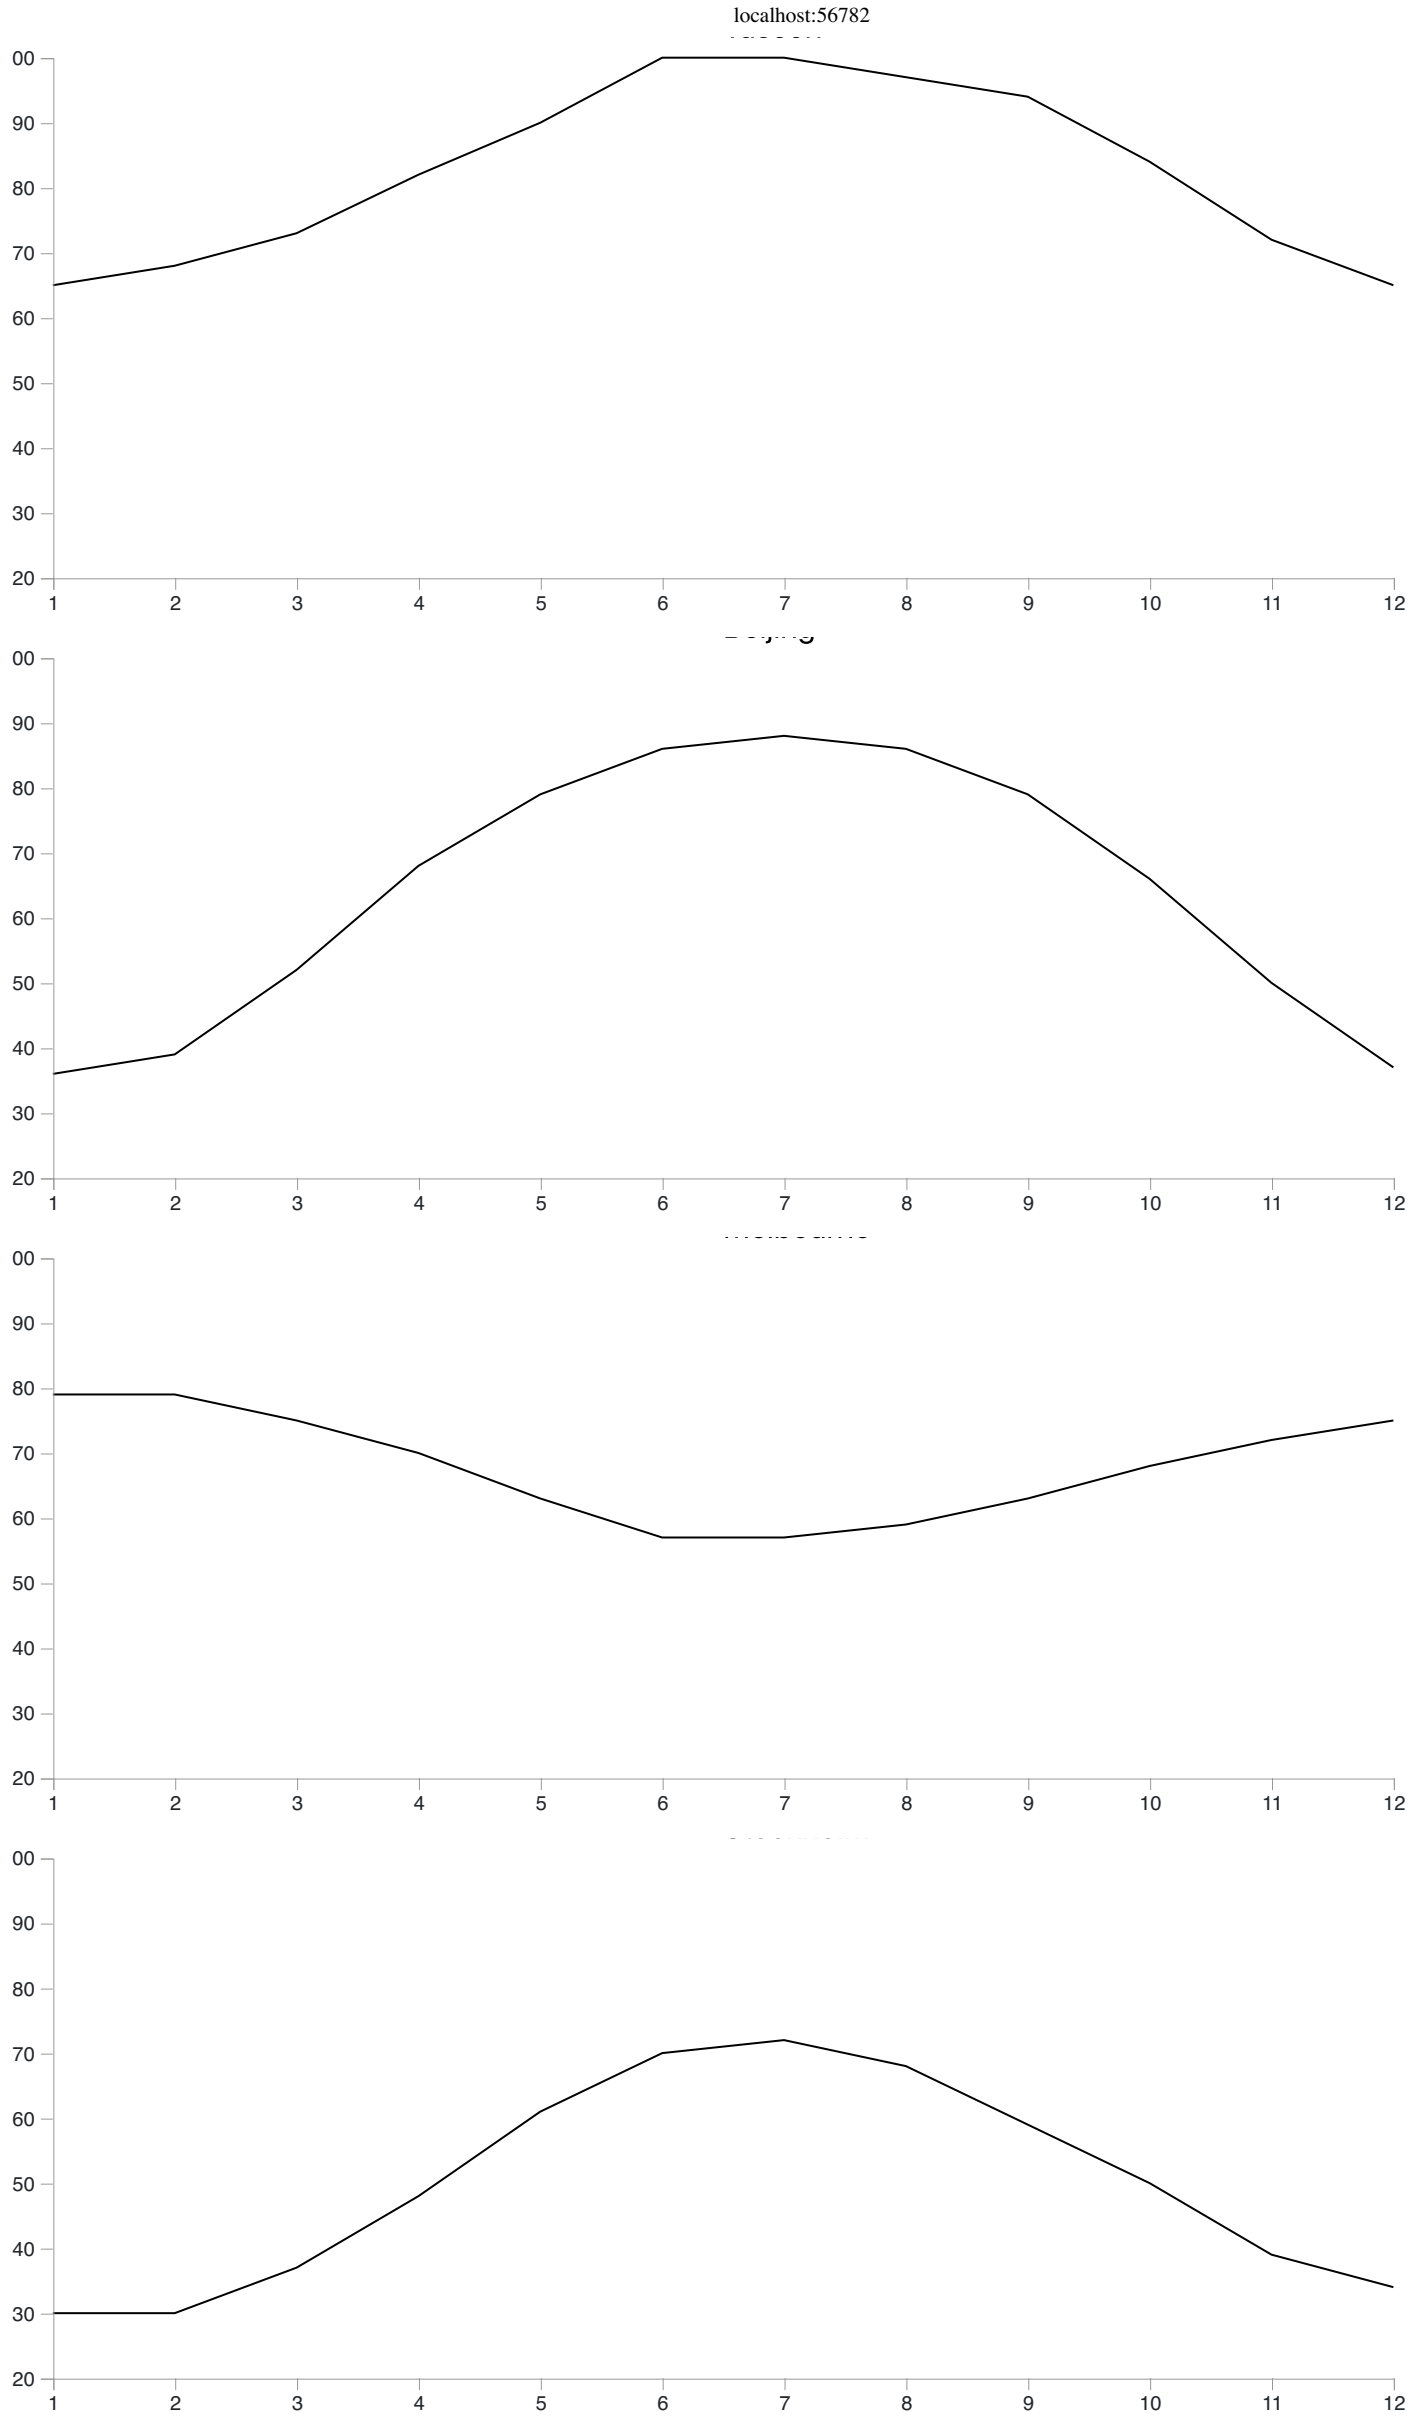

Chart 3: What's a `<g>` tag?

Let's see how we can push things around.

Chart 4: One <g> per datapoint

Let's graph the maximum temperature for each city.
